

Iron Door Syles.

The ACC Committee has been receiving a new request in the past year for Iron Door replacements on their front doors. We are providing these examples as some basic guidelines as to what type of an iron door would compliment the John Wieland, southern, traditional homes that we enjoy in Edgewater. Classic, colonial lines as well as *some scrollwork styles, work well with our neighborhood's style.

Please submit images of your selected door with any impact on the front façade with your modification request **PRIOR to purchase and installation.**

Iron doors add value and additional security to your home. The ornamental scrollwork and intricate design of wrought iron doors serves more than just an aesthetic purpose. In many models, the glasswork can be opened without having to open the entire door. Allowing you to interact securely if so needed.
